Whole Farm Revenue Protection: A Crop Insurance Available in All Wyoming Counties

Expansion Crop insurance coverage is available for 15 individual crops or crop groups in Wyoming. However, for several crops federally-subsidized insurance coverage is only available in a limited number of counties.

An insurance product that may be of interest to beginning farmers and ranchers and producers of small acreages of multiple high-value crops is the Whole-Farm Revenue Protection Policy (WFRP). This pilot policy has been available to producers in all Wyoming counties in recent years.

This policy paper provides a description of the Whole-Farm Revenue Protection Policy and illustrates the application of WFRP to an example Park County irrigated farm.
