

4 January 2021 – Laramie, WY

RightRisk Contributes to UW Extension - Ag & Hort Convention 2021

RightRisk is offering a number of presentations as part of the University of Wyoming Extension Agriculture and Horticulture Online Convention.

More than 50 presentations are scheduled during the University of Wyoming Extension agriculture and horticulture online conference Jan. 4-15.

"The virtual convention is a great opportunity for people to learn new information when unable to travel to traditional in-person type events," said Brian Sebade, UW Extension educator.

The conference is free. Only registered participants will be sent a link to the conference. Registration is available at <https://bit.ly/ag-hort-2021-conference>.

"The various presentations will be available over a set period of time to allow participants to view sessions at their convenience and provide a better opportunity to view sessions for those with busy schedules," said Sebade. In addition, several live bullpen sessions will allow participants the chance to interact with presenters.

Presentations are under seven topic blocks: livestock production; production agriculture; economics and risk management for agricultural producers; yards, gardens and acreages; succession planning; water management and drought; and economic and marketing outlooks.

Over 50 presentations set for UW Extension's online conference this January

- UW Extension's Agriculture and Horticulture team is hosting an online convention Jan. 4-15.
- Pre-recorded presentations, live interaction with convention presenters via bullpen sessions, and much more will be available.
- Topics span the range of agricultural and horticultural interests: from soils to pest management, native plants to backyard chickens, risk management analytics to managing cattle in drought conditions, toxic plants to minimizing livestock losses during wildfires and blizzards, water resource management, and a crop and livestock market outlook.
- Watch these pages or see facebook.com/UWAGHORT for details on how to participate, a schedule of events, and more details for the over 50 presentations scheduled.
- [Click here to REGISTER](#) to reserve your spot!

Presentation topics span from soil to pest management, native plants to backyard chickens, risk management analytics to managing cattle in drought conditions, and toxic plants to minimizing livestock losses during wildfires and blizzards.

AG/HORT CONFERENCE | JAN 4-15, 2021

Free registration and information at <https://bit.ly/ag-hort-2021-conference>

LIVESTOCK PRODUCTION

Managing Cattle in Drought Conditions

Beef Cattle Heifer Development

Horn Fly Management for Wyoming Beef Cattle

Pasture Analysis to Adjust Herds for Another Drought

Measures to Minimize Livestock Losses During Wildfires and Blizzards

Poisonous Plants of High Elevation Irrigated Meadows

Direct Marketing Beef Considerations

Wyoming Freezer Beef

PRODUCTION AGRICULTURE

Sunn Hemp as a Potential Forage Crop

Cost of Burning Crop Residues – Soil Impacts, Nutrient Loss, and Disease

Grape Phylloxera—a New but “Old” Grape Pest Now in Wyoming

Blister Beetles in Alfalfa—IPM Information for Hay Producers

Blister Beetles in Alfalfa—Information on the Risk They Pose for Hay Consumers

Japanese Beetle—Another New Pest for Wyoming

Assessment, Management, and Restoration of Wyoming Soils—Introducing a Wyoming Soil Health Initiative

Grazing Management—Systems and Methods

Composting Livestock Mortalities and Butcher Waste

Integrating Annual Forages Into Irrigated Small Grains

Don't Volatilize Your Bank Account—Avoiding Loss of Nitrogen Fertilizers

ECONOMICS AND RISK MANAGEMENT FOR AGRICULTURAL PRODUCERS

Evaluating Risk Alternatives via Rightrisk Analytics

Calculating Machinery Costs

Enterprise Risk Analysis—an Overview

Calculating Custom Rates

Evaluating Risk Strategies

Hiring and Keeping Agricultural Workers

Understanding Risk in Ag

Negotiation in Agriculture—Where Do I Start?

Drone Regulations

YARDS, GARDENS, AND ACREAGES

A Few Native Plants for Gardens

Starting Plants From Seed Indoors

Small Scale Season Extension for Backyard Gardeners

Alternative Non-Chemical Pest Control for Vegetable Gardens

Getting the Most From Your Vegetable Garden

How to Take and Interpret a Soil Test for Gardens

Backyard Chickens or Getting Started With Poultry

Things to Plan For With a Backyard Livestock Project

Deer Damage Prevention in a Landscape Setting

Right Tree, Right Place—Tree Selection and Planting

SUCCESSION PLANNING

What Is an Ag Legacy

How Are You Communicating With the Next Generation?

Why Don't Family Businesses Plan for Succession?

How Do You Plan for the Cost of Succession?

Difficult Conversations—How Do We Discuss What Really Matters?

Where Are We With Our Management Succession?

How Do You Handle End-of-Life Issues in Your Legacy Planning?

Drafting a Power of Attorney That Lessens the Chances of Abuse

WATER MANAGEMENT AND DROUGHT

Wyoming Conditions: 2020 Drought & 2021 Water Year—What Might We Expect in the Coming Months?

Economic Impacts of a Water Demand Management Program in the Wyoming Colorado River Basin

Demand Management Feasibility Assessment in the Wyoming Colorado River

ECONOMIC AND MARKETING OUTLOOKS

Wyoming Economic Outlook—COVID-19, Energy Transitions, and Legacies

The Economic Impacts of COVID-19 on Wyoming's Agricultural Sector

Crop and Livestock Market Outlook for 2021

Wyoming Food Freedom Act
