## Evaluating Lease Agreements via RightRisk Analytics

**Leasing** or renting pasture or forage is commonplace for many livestock producers. The *Forage Risk Analyzer* tool, from RightRisk.org, is a tool designed to help a single or multiple parties (up to six) understand the full value of everything involved in a potential lease and formulate a more fair and equitable agreement. For examples using the tool see *Applied Risk Analytics* “Evaluating Lease Arrangements” at [RightRisk.org/AppliedRiskAnalytics](http://RightRisk.org/AppliedRiskAnalytics)

The *Forage Risk Analyzer* tool is one of over 30 individual risk analysis tools developed by RightRisk and available free of charge at: [RightRisk.org/analytics](http://RightRisk.org/analytics).
