

Evaluating Pasture, Rangeland, Forage - Rainfall Index Coverage

Ben Burwell is worried about forage production in his Platte County pasture. He is looking for alternatives to manage the risk of low production that can happen in dry years. He is considering the purchase of Pasture, Rangeland, Forage Rainfall Index (RI-PRF) insurance coverage on 1,200 acres of non-irrigated range. RI-PRF is designed to offer protection against revenue losses resulting from decreased forage production, using a rainfall index to indicate low precipitation levels.
